2. Key Health Sector Response and Coordination:

Honorable Minister for Ministry of Health and Food Safety conducted an on-site monitoring visit today to Bidur Municipality and surrounding areas affected and damaged by the flooding of the Bhotekoshi River to assess the status of health services, identify the health needs of local communities, and assess potential health risks.

During the monitoring visit, Honorable Minister visited Trishuli Safe House and the Kiriyaputri Building in Bidur Municipality-1; flood-affected Trishuli Bazaar and areas along the river; the Ayurveda and Alternative Medicine Hospital; Lower Pipaltar, Nuwakot; and Chandrajyoti Secondary School to assess the situation on the ground. The Minister interacted with affected and displaced communities to understand their health conditions and also met with injured persons, doctors, and health workers to assess the status of treatment and health service arrangements.

The monitoring also focused on assessing the availability of essential medicines and medical supplies in the affected areas and coordinating with relevant authorities to arrange additional medicines and health supplies based on identified needs. Information was also obtained regarding the mobilization of health workers, treatment arrangements for injured and sick persons, measures to reduce the risk of communicable diseases, and the availability of counselling services to address the mental health and psychosocial needs of affected communities.

Ministry of Health and Food Safety is committed to ensure that affected communities are not deprived of essential health services, and is continuously coordinating with relevant authorities and ensuring the mobilization and management of necessary human resources, medicines, and medical supplies, for the same.

Key Health Sector Response and Coordination:

Disease Surveillance: In the affected areas, through the disease surveillance system (Surveillance, Outbreak Response Management and Analysis System (SORMAS)), **2 Acute Gastroenteritis (AGE), 1 fever, 2 fever with cough (ILI), 4 Fever with Rash, and 1 Animal Bite cases** were reported in the past 24 hours, and appropriate management of these cases is being carried out by the respective local levels.

- **Body Management and Post-Management Environmental Decontamination Work:** Teams have been deployed to flood-affected areas for body management and post-body management environmental decontamination work.

TB and HIV Response

- ☑ A draft of the Post-Flood Tuberculosis Response Plan has been prepared.
- ☑ Contact is being established with 173 patients currently under treatment across 15 disaster-declared local levels to ensure the continuation of their treatment.
- ☑ A coordination meeting has been completed among relevant partners and stakeholders regarding HIV service continuity and response.
- ☑ A Task Group has been formed for Need and Resource Assessment to identify the status of ART and other HIV services, challenges to treatment continuity, requirements for medicines/supplies, human resources, access, and service delivery.
